PROFESSIONAL SUMMARY

Electronics & Communication Engineering student (CGPA 8.2) with hands-on project experience in Python programming, embedded systems, and hardware-integrated applications. Strong foundation in basic electronics and problem-solving, combined with proven communication, leadership, teamwork, and time-management skills. Multilingual communicator seeking opportunities in software development or digital/VLSI design roles.

SKILLS

Technical: Python, Basic Electronics, C Programming, Arduino IDE, Embedded C

Professional: Communication, Leadership, Time Management, Teamwork

Languages: Kannada, English, Hindi

EDUCATION

Tontadarya College of Engineering, Gadag, Karnataka 2023 - 2027

Bachelor of Engineering (BE), Electronics & Communication Engineering

CGPA: 8.2 (up to 6th semester)

Sai Niketan PU Science College, Karnataka 2021 - 2023

PUC - PCMB

Percentage: 78.62%

PROJECTS / OPEN-SOURCE

White-Board Drawing Application *Python, Tkinter*

- Developed a desktop whiteboard drawing application using Python and the Tkinter GUI library, allowing users to draw freely on a digital canvas with the mouse.
- Implemented color selection, adjustable brush size, and canvas-clearing features.
- Strengthened understanding of GUI development, event handling, and Python programming.

Bluetooth Controlled Robot *Arduino IDE, C Programming*

- Designed and built a Bluetooth-controlled robot using Arduino Uno, an HC-05 Bluetooth module, and a motor driver.
- Enabled the robot to receive commands from a smartphone app to move forward, backward, left, right, and stop.
- Strengthened understanding of embedded systems, wireless communication, and motor control.

Maze Following Robot *Arduino IDE, Embedded C, IR Sensors*

- Built an autonomous maze-following robot using Arduino Uno, IR sensors, and a motor driver.
- Programmed the robot to detect maze paths via sensor input and navigate the correct route autonomously.
- Strengthened understanding of embedded systems, sensor interfacing, and autonomous navigation.
